

Artifact Manifest

This file maps retained thesis evidence to the public repository artifacts.

Each retained phase is documented by a tagged code snapshot, a phase protocol, an archived run directory, and an aggregate report. Tags and archived outputs are the stable reference points for the reported claims.

Evidence Map

Phase 1: Baseline Simple-Game Evolution

Tag: phase-1-baseline

Artifacts: early simple-game run outputs under runs/, with supporting protocol notes under docs/.

Phase 2: Adversarial Curriculum and Holdout Tests

Tags: phase-2-adversarial-curriculum, phase-2b-factorial-holdout

Artifacts: configs/curriculum_suite/, configs/factorial_holdout_suite/, runs/curriculum_suite/, and related phase reports under docs/.

Phase 3 and Phase 4: Transfer and Causal Transfer

Tags: phase-3-transfer, phase-4-causal-transfer

Artifacts: configs/transfer_suite/, runs/transfer_suite/, docs/FACTORIAL_AND_TRANSFER_PROTOCOL.md, docs/PHASE_4_CAUSAL_TRANSFER_PROTOCOL.md, and docs/PHASE_4_NOVELTY_ADJUDICATION_2026-05-10.md.

Phase 5: Routing Archive Across TSP, ATSP, and CVRP

Tag: phase-5-routing-archive

Artifacts: configs/tsp_suite/, configs/atsp_suite/, configs/cvrp_suite/, runs/tsp_suite/, runs/atsp_suite/, runs/cvrp_suite/, docs/TSP_PHASE_5_PROTOCOL.md, docs/ROUTING_PHASE_5B_5C_PROTOCOL.md, and docs/PHASE_5_ROUTING_RESULTS_2026-05-14.md.

Phase 6: Replay-Aware TSP Mechanism

Tag: phase-6-replay-mechanism

Artifacts: configs/tsp_phase6_suite/, runs/tsp_phase6_suite/, docs/PHASE_6_TSP_REPLAY_MECHANISM_PROTOCOL.md, and docs/PHASE_6_TSP_REPLAY_MECHANISM_RESULTS_2026-05-20.md.

Phase 7: Operator Rediscovery and Failure Modes

Tag: phase-7-operator-discovery

Artifacts: configs/tsp_phase7_suite/, runs/tsp_phase7_suite/, docs/PHASE_7_TSP_OPERATOR_DISCOVERY_PROTOCOL.md, and docs/PHASE_7_TSP_OPERATOR_DISCOVERY_RESULTS_2026-05-20.md.

Phase 8: Adaptive Portfolio Tests

Tag: phase-8-adaptive-portfolio

Artifacts: configs/tsp_phase8_suite/, runs/tsp_phase8_suite/, docs/PHASE_8_ADAPTIVE_HEURISTIC_PORTFOLIO_PROTOCOL.md, and docs/PHASE_8_ADAPTIVE_HEURISTIC_PORTFOLIO_RESULTS_2026-05-21.md.

Phase 9: Real-World CVRP Solver Evolution

Tag: phase-9-real-world-vrp

Artifacts: configs/cvrp_phase9_suite/, runs/cvrp_phase9_suite/, docs/PHASE_9_REAL_WORLD_CVRP_SOLVER_EVOLUTION_PROTOCOL.md, and docs/PHASE_9_REAL_WORLD_CVRP_SOLVER_EVOLUTION_RESULTS_2026-05-21.md.

Phase 9 Closeout: Budget-Control CVRP

Tag: phase-9-closeout-budget-control

Artifacts: configs/cvrp_phase9_closeout/, runs/cvrp_phase9_closeout/, docs/PHASE_9_CLOSEOUT_BUDGET_CONTROL_CVRP_PROTOCOL.md, and docs/PHASE_9_CLOSEOUT_BUDGET_CONTROL_CVRP_RESULTS_2026-06-05.md.

Phase 10: Cross-Family Synthesis

Tag: phase-10-cross-family-synthesis

Artifacts: configs/cross_family_synthesis/, runs/cross_family_synthesis/meta_patterns_20260522_165500/, and docs/CROSS_FAMILY_CODE_EVOLUTION_SYNTHESIS_2026-05-22.md.

Phase 11: Model-Strength Factorial

Tag: phase-11-model-strength-factorial

Artifacts: configs/model_strength_factorial/, runs/cross_family_model_x_evolution_factorial/20260524_172130/, docs/MODEL_STRENGTH_FACTORIAL_PROTOCOL.md, and docs/MODEL_STRENGTH_FACTORIAL_RESULTS_2026-05-27.md.

Phase 12: State-of-the-Art CVRP Calibration

Tag: phase-12-sota-cvrp-hgs-baseline

Artifacts: run_cvrp_phase12_sota_hgs_baseline.py, runs/cvrp_phase12_sota_hgs_baseline/pyvrp_hgs_20260721_heldout_30sx5/, docs/PHASE_12_SOTA_CVRP_HGS_BASELINE_PROTOCOL.md, and docs/PHASE_12_SOTA_CVRP_HGS_BASELINE_RESULTS_2026-07-21.md.

Prompt, Candidate, and Generated-Code Records

Official run directories preserve experiment records emitted by the harness when those records are part of the run provenance. These records include prompt text sent to the model, model responses, extracted candidate JSON files, generated policy or solver code, validation records, and fallback/error records.

Aggregate values are reported in the phase reports and run summaries. Prompt, candidate, generated-code, and validation records establish provenance for the evolved programs that produced those aggregate reports.

Excluded Private Material

The public repository excludes:

- API keys, .env files, local credentials, or account identifiers.
- Private thesis drafts, presentation drafts, or committee-revision notes.
- Large transient worker outputs that are not referenced by a phase report.
- Local caches, virtual environments, compiled bytecode, and editor metadata.

The ignored DO NOT COMMIT/ directory is reserved for private thesis, presentation, and administrative material.

Notes on Non-Retained Work

The clean-model-strength-continuum direction was not pursued as a thesis phase and is recorded as future work rather than supporting evidence.

Historical exploratory artifacts may include checks outside the retained thesis evidence. In particular, the direct-Codex CVRP check in the cross-family synthesis artifacts is preserved for context but is not used as retained thesis evidence because it was not a frozen replicated condition.
