

Phase 5 TSP Benchmarks

This directory contains the benchmark pack for the replay-aware TSP phase.

Contents

- manifest.json: main phase-5 benchmark manifest
- smoke_manifest.json: smaller smoke-test subset
- tsplib95/: downloaded TSPLIB95 problem files and optimal-tour files for the selected EUC_2D subset

Source Basis

- Official catalog: TSPLIB95 TSP data (<https://comopt.ifl.uni-heidelberg.de/software/TSPLIB95/tsp.html>)
- Official best-known symmetric tour values: STSP best-known solutions (<https://comopt.ifl.uni-heidelberg.de/software/TSPLIB95/STSP.html>)
- Direct file retrieval in the preparation script currently uses the Rice mirror: softlib.rice.edu/pub/tsplib/tsp (<http://softlib.rice.edu/pub/tsplib/tsp/>)

The benchmark-preparation script computes best_known_cost values from the corresponding optimal-tour files for the selected subset instead of hardcoding them by hand.

Preparation

```
C:\Users\kaaro\.cache\codex-runtimes\codex-primary-runtime\dependencies\python\python.exe  
prepare_tsp_benchmarks.py
```
